Specification

Framework	ARM-A9
Processor	Quad-core Cortex 2.0GHz (with heat sink for cooling)
Memory	DDR3 2GB
Flash	8GB
Graphics	Graphics Card Type MALI400 1080P
OS	Embedded Linux Kernel
Video	VGA resolution 800*600/1024*768/1366*768/1440*900/1280*1024p HDMI resolution 1280*720/1920*1080p (MAX.)
USB	USB2.0*4
Video	Full Screen 1080P HD
Upgrade	Firmware update
Power supply	DC5V/2A
Size & Weight	15.7*10.7*2.7cm, 0.3kg
Protocol	RDP 10
External ports	HDMI, VGA, USB*4, RJ45, DC5V, Power Switch, Audio Port
Management software	Free for life

Benefits of replacing PC with Link PC+ Zero Client

1. Reduce Purchase Costs

With zero client solution, it can replace the traditional desktop PC to Link PC+ Zero client to save a lot of purchase costs and the OS license costs for each user.

2. Easy Deployment

There is no need for the IT staff to install every single desktop PC one by one, all installations can be done on one server. The IT staff just need to set up the end users for the first time, then they can centrally manage the thin client on the server. Zero Client can connect with the server through RDP protocols, then share the resources on the server. In this way, it saves a lot of time for deployment.

3. Central Management

Software maintenance operations became streamlined, as everything was installed on servers, not individually on over multiple desktop PC's. IT staff will therefore spend less time and money supporting each device, it makes easier for the IT staff to manage all the Zero clients in one time.

4. Zero Noise

The zero client is cooled without fans which reduces power consumption, it allows silent operation, and dissipates less heat.

5. High Security

To avoid the data security, the USB flash disk can be disabled on zero client, and set up a password to prevent the staff resetting the setup. All the data will be saved locally. Therefore, it is more secure with zero client solution.

Characteristics of the Management Software

The Management software, is developed no only for management, but also teaching & Learning for school application. The software interface is friendly and easy to understand with multiple functions, which makes it a good solution for classroom.

1. One-click batch login
2. Screen monitoring
3. Screen Broadcasting
4. Chat and file transfer
5. Network lock
6. USB mount

Management Software

1 Install Software Hmanager

1 Connect zero client with monitor, Keyboard & Mouse and LAN

1 Assign Users (Create Desktop) for all zero clients

1 Login Done

***Supports Printers, USB Drives, Full HD Display, Audio (Speakers & Headphones).
One key broadcasting, Screen Monitoring, File Transfer, Chat, etc.***

USB Printer

USB Flash Disk

All Windows Versions

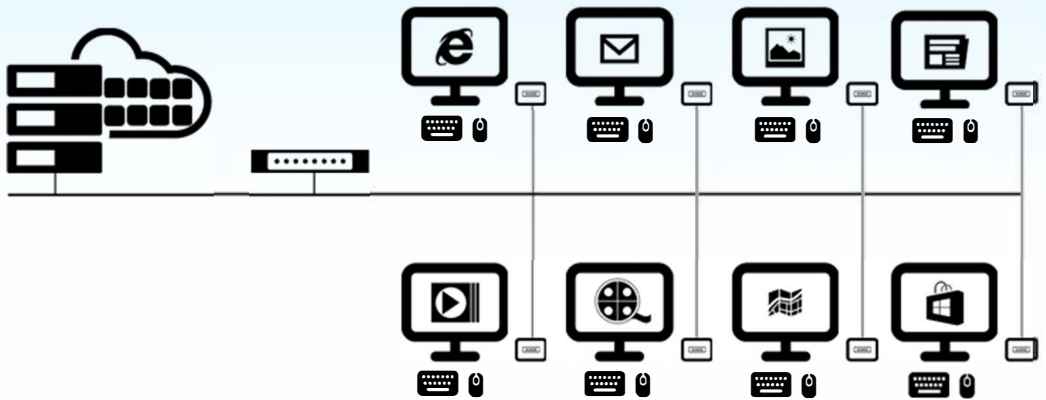

1080P Video

Headphones & speakers

LINK PC⁺

SECURE YOUR SYSTEM

Link PC+ Advantage

- * One key Broadcast
- * File Transfer
- * Secure Data
- * Monitoring
- * Easy Maintenance
- * Cost Saving
- * Centralized Management
- * Safe & Efficient
